

Michael Smart is an aquatic plant ecologist and research team leader in the Environmental Laboratory of the US Army Corps of Engineers' Engineer Research and Development Center (ERDC). In addition to serving as a research team leader, Michael is the Leader of the Ecological Assessment Technology Area under the Corps' Aquatic Plant Control Research Program and also directs research activities at the Lewisville Aquatic Ecosystem Research Facility, an experimental field station in Lewisville, Texas, that is dedicated to research on the biology, ecology, and management of aquatic plants. Dr. Smart earned a BS in Marine Biology from the University of Southern Mississippi and a PhD from the University of Delaware. His research concerns the effects of environmental factors on the growth and distribution of aquatic plants, competitive interactions between native and exotic plants, propagation and culture of aquatic plants, management of invasive aquatic plants, and restoration of native aquatic and wetland plant communities. Dr. Smart has served as a Director of the Aquatic Plant Management Society and two terms as President of the Texas Aquatic Plant Management Society.
