

Chuck Theiling has been a biologist with the Rock Island District of the Corps since 2000. He has worked on Mississippi and Illinois River ecosystem monitoring and restoration for the Environmental Management Program and the Navigation Study for the Illinois Natural History Survey and USGS since 1990. He started as an MVD Regional Technical Specialist for Ecological Modeling in 2009 and completed a PhD in Large River Ecology from the University of Iowa in May 2010. Research interests are varied and his dissertation focused on hydrogeomorphic and human development influences and opportunities for ecosystem restoration on the Upper Mississippi River System (UMRS).
